

# ACME Management Solution & Value Engineering

*Value delivered.....*

to...

## Who We Are?

ACME Management Solutions & Value Engineering is a team of professionals hailing from most premier institutions, commanding diversified expertise & having rich experience of construction industry from housing to hospitals to high rise towers to aesthetically rare & complicated bungalows to most simple row houses controlling all independent activities from structural completion to MEP to Façade works to elevators to landscapes to interior finishes, handing you over your dreams as reality.

## Your dreams our efforts

Our diversified team of professionals allows us to manage your project from conceptualization to completion with explicit control on costs, quality and timelines ensuring the safest work environment. You dream it and we carve it to reality.

We believe in value addition through continuous improvement.

## What We Do?

### Leadership for hire.

Building the right team is a key to successful project completion. Start with ACME Management Solutions & Value Engineering—experts at keeping project partners focused on your budget, scope, timeline and quality.

As team leaders and moderators, our construction managers help move your projects forward by:

- ♦ Coordinating all moving pieces
- ♦ Serving as a central point of communication
- ♦ Anticipating problems before they arise
- ♦ Controlling costs and schedules
- ♦ Providing a hands-on approach

We safeguard your best interests at every step and promote teamwork & transparency among all project stakeholders. Understanding construction is not that complicated with us around you, we explain everything making you feel it as easy as a chore.

## Early returns.

Experience shows that the earlier you involve a construction manager in a project, the better. This fact dovetails neatly with new delivery methods that call for greater stakeholder collaboration from the start. Once you're ready to build, count on ACME to oversee your construction projects from conceptualization to completion!!

We cover the following areas when it comes to Infrastructure Projects

1. Turnkey Project Management
2. Value Engineering Services
3. Cost Surgery & Quantity Surveying
4. Construction Management
